Easitilt Pivoting Axle

- ⊕ The **Easitilt**® pivoting axle reduces the efforts required to tilt a loaded hand trolley rearward by an amazing 60%, and a load of 300kgs feels equal to a load of only 120kgs.
- ⊕ Further-more, when the trolley is in the wheeling position the load is normally in balance equilibrium over the axle which means loads are better balanced and much easier to wheel
- ⊕ The operator does not need to apply counter force by placing one foot on the axle and is free to position them self to use their own body weight to more effectively assist in the tilting operation.
- ⊕ This enables both feet of the operator to be on the ground and is able to stand in an upright position with a straight back with no pressure bearing on the operator's spine.

Easitilt ® Twin Handle 300

TH300
